A COURSE HAS BEEN ORGANIZED to establish the relationship of Injection Therapy (Acupuncture related) to a multitude of ambulatory surgical techniques that are performed on the foot. In all my years of practice (29), I have found syndromes affecting the body that arise from foot disorders. These can be chemically, neurologically and mechanically related so as to provide a clearer and more precise understanding of foot and body function. With this course you will be able to understand why some surgeries work and others do not. With this knowledge the Podiatric Surgeon will reduce the number of embarrassing surgical errors and become more successful in surgical endeavors. Previous students: Dr. Al Brown, Dr. Lennie Britton, Dr. Larry Hilderbrand. For further information, please contact Howell Sherman, DPM, 5542 West Oakland Pk. Blvd., Inverness Plaza, Lauderhill, Fl. 33313.
